## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 18, 2004 has been entered.

### ***Claim Objections***

2. Claim 18 is objected to because of the following informality: please add --at least a-- in front of "portion of" (see line 11). Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 3-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. Regarding claim 3, "said configuration" (see line 2) lacks antecedent basis.

b. Regarding claim 4, "the portion" (see line 2) lacks antecedent basis.

c. Regarding claim 5, "the portion" (see line 2) lacks antecedent basis.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-6, 12, 18, and 19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Mahmoodi (DE 296 18 925 U1).

As seen in Figures 1-4, Mahmoodi discloses a valve shield comprising a shaped sheet of material *adapted to* be fixed to the annulus (see bottom crescent-shaped bar/hoop/bracket) of a cardiac valve having first and second leaflets, said sheet of material having a surface area *configured to* match and overlies at least a portion of the first leaflet of the valve (see bottom crescent-shaped bar/hoop/bracket), and *adapted to* be contacted by a portion of the second leaflet of the valve, whereby to facilitate closing of the valve (compare Figure 3 with Figure 4; see entire document). It should be noted that the reconstruction shield, as a whole, comprises two connecting struts connecting two crescent-shaped bars/hoops/brackets. Because of the unitary structure, the connecting struts and/or top crescent-shaped bar/hoop/bracket meet the intended use recitation “adapted to be contacted by a portion of the second leaflet of the valve”. Although not particularly disclosed by Mahmoodi, it is well known in the art to provide openings in order to suture these devices (i.e., shields, rings, or annuloplasty rings) to the valve leaflet and/or annulus.

*Response to Arguments*

7. Applicant's arguments filed October 18, 2004 have been fully considered but they are not persuasive.

It is noted that Applicant's arguments are based on functional language and/or intended use recitations. The intended use recitations (i.e., "configured to match and overlie", "adapted to be contacted by a portion of the second leaflet", "adapted to prevent prolapse of the first leaflet") carry no patentable weight in the absence of any distinguishing structure. Mahmoodi (DE 296 18 925 U1) disclose the structure (and intended use) as claimed and is found to be inherently capable of performing the function.

*Conclusion*

8. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 3738

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Angell (US 4,042,979 A).
